

Project Progress Update – FIT3162

Name: Chan Wai Han (31555373)

Submission Week: 3

1. What has been accomplished over the previous 3 weeks

The following are the tasks that have been completed from week 1 to week 3:

- Delegating the tasks to team members in terms of the front-end and back-end
- Confirming the project management tools
- Finalizing the development environment
- Finalizing the coding language
- Downloaded relevant files for the project such as the datasets
- Identifying features required to be implemented
- Setting up the Git repository
- Creating the design for the user interface
- Begun development for the user interface

2. What degree of completion was reached in comparison to previous set goal

The degree of completion and progress of our tasks can be seen in the Gantt Chart (Appendix I). Firstly, the delegation of tasks, and the finalizing of the tools and resources for the project was completed in week 2. Then, in week 2 to 3, the Git repository was successfully set up, with each member having their own branches (Appendix II). Besides that, in terms of the user interface, the design was completed (Appendix III) in week 2 and development begun in week 3. There was a delay in completing all the tasks by one week except for the design of the user interface. All of the delayed tasks were supposed to begin in week 1. However, our team only began working on the tasks in week 2. Regardless, we managed to complete them on time.

3. What is the goal set for the following 3 weeks

The following are the tasks that have been set to complete from week 4 to week 6:

- Complete the user interface
- Complete pre-processing of dataset
- Complete the classification algorithm
- Complete the project management report
- Complete the reflection 1
- Complete the interim presentation

4. What was the reason for failing to meet the set goal

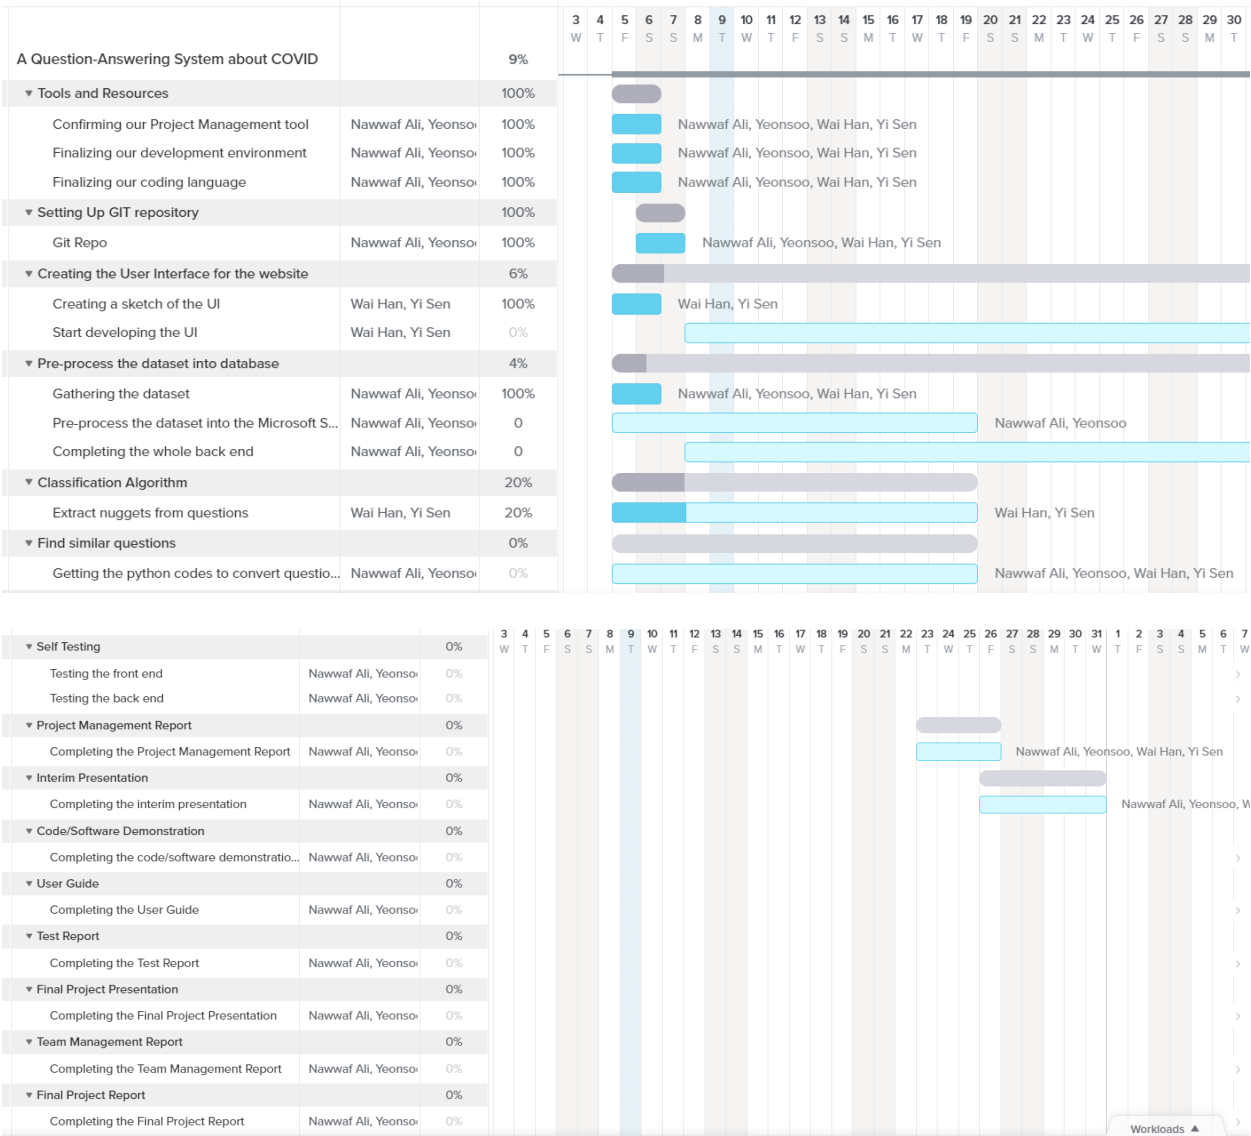

The main reason that our team failed to meet the set goal was because our team did not hold any meeting in week 1. This was because we were overwhelmed by the transition from the semester break into the new semester. Not only were we setting and downloading tools for the new semester, we had team members who needed to study for the supplementary assessment. Regardless, we understand that this is not a valid excuse and we will do our best to get back on track with the work.

5. What will be undertaken to make up for missed goal

A more detailed Gantt Chart was created. All tasks were listed out in detail with deadlines carefully thought out. Besides that, our team agreed on holding more meetings during the week to ensure that each member's progress on their respective tasks is kept up to date.
